

NOTICE to Scarborough Railroad Station Commuters

With the near completion of Metro North's on-site station work, we are implementing a series of parking and traffic changes effective Tuesday, August 10th. We have included a layout map for your use and information. The primary changes are as follows:

- 1. Commuter passenger drop-off ("kiss and ride")** and pick-up is now located north of the bus garage at the new station semi-circle. **This is one-way: ENTRANCE ONLY.** Drivers are to exit by driving south towards the Post Office. Please avoid blocking/boxing in other cars.
- 2. We have designated exclusive areas to maximize the number of parking spaces by use:**
 - a. Primary Self Parking** has been moved closer to the new station. Please use both sides of the area immediately south of the drop off zone. Parking is to be perpendicular: please back into the marked stalls.
 - b. Primary Valet Parking** has been moved to the boxed in areas north of the McGlew & Tuttle building to the Valet kiosk. Please continue to use the current Valet parking drop off zone when choosing Valet Parking. **No self parking will be permitted in this new area.**
- 3. The remaining VBM owned Scarborough Station parking areas remain mixed use.**
4. We will have police officers on hand to assist as the parking and traffic patterns take effect.
5. Metro-North is planning to re-set a raised sidewalk adjacent to the fence between the Post Office and the new station as well as a sidewalk from Kemey Avenue to the new station's drop-off zone. Later this year, we are planning on relighting, repaving and repainting the parking lot.

Much time and effort has been made to expedite our Scarborough Station improvements. While the work is not complete, we wish to thank you for your patience and understanding.

By order of the Mayor and Board of Trustees:
Philip E. Zegarelli, Village Manager
August 9, 2010.
